

**FCC Rural Health Care Pilot Program  
Texas Health Information Network Collaborative (THINC)  
Quarterly Data Report  
July 30, 2008**

**Federal Communications Commission WC Docket No. 02-60**

**1. Project Contact and Coordination Information**

a. Identify the project leader(s) and respective business affiliations.

The Project leaders and their affiliations are:

George S. Conklin, SVP and CIO  
CHRISTUS Health  
Houston, Texas

Ralph Farr, CIO  
University of Texas Medical Branch (UTMB)  
Galveston, Texas

David Cantrell, CIO  
Texas A&M Health Sciences Center  
College Station, Texas

Quang Ngo, Vice President and CIO  
Texas Organization of Rural and Community Hospitals (TORCH)

Hank Fanberg  
CHRISTUS Health  
Houston, Texas

b. Provide a complete address for postal delivery and the telephone, fax, and e-mail address for the responsible administrative official.

The responsible administrative official is:

George S. Conklin, SVP and CIO  
CHRISTUS Health  
2600 North Loop West  
Houston, Texas 77092  
713-684-3877 (p)  
713-684-3555 (f)  
[George.conklin@christushealth.org](mailto:George.conklin@christushealth.org)

c. Identify the organization that is legally and financially responsible for the conduct of activities supported by the award.

While a new not for profit entity is being formed for purposes of this activity, the four founding members of this initiative (CHRISTUS Health, Texas A&M Health Sciences Center, TORCH, and UTMB) entrusted CHRISTUS Health to be legally and financially responsible for the conduct of activities supported by this award.

d. Explain how project is being coordinated throughout the state or region.

Our designated geographic area is inclusive of the entire state of Texas. THINC has conducted and will conduct various activities to coordinate the project throughout the state. These activities include:

- Discussions with various organizations such as the Texas Hospital Association, the Texas Association of Rural Health Clinics, Texas Association of Community Health Centers to inform them of the initiative and work with them to determine interest and requirements for participation
- Communication to all named participants focused at this time on verifying eligibility and interest as well as an initial survey of current and future telemedicine needs
- Coordinating with the Texas Health Services Authority, created by the Texas Legislature to "serve as a catalyst for the development of a seamless electronic health information infrastructure to support the health care system in the state and to improve patient safety and quality of care."

The State Legislature created the Texas Health Services Authority in 2007 as a statewide forum/platform for the promotion and coordination of HIT/HIE initiatives. The THSA is a public-private partnership, legally structured as a non-profit corporation governed by a board of gubernatorial appointees. The Governor's office has plans to assure that THINC and THSA work closely together.

## **2. Identify all health care facilities included in the network.**

a. Provide address (including county), zip code, Rural Urban Commuting Area (RUCA) code (including primary and secondary), six-digit census tract, and phone number for each health care facility participating in the network.

b. For each participating institution, indicate whether it is:

i. Public or non-public;

ii. Not-for-profit or for-profit;

iii. An eligible health care provider or ineligible health-care provider with an explanation of why the health care facility is eligible under section 254 of the 1996 Act and the Commission's rules or a description of the type of ineligible health care provider entity.

Please refer to Attachment A at the end of this document for a list of all facilities

**3. Network Narrative: In the first quarterly report following the completion of the competitive bidding process and the selection of vendors, the selected participant must submit an updated technical description of the communications network that it intends to implement, which takes into account the results its network design studies and negotiations with its vendors. This technical description should provide, where applicable:**

- a. Brief description of the backbone network of the dedicated health care network, e.g., MPLS network, carrier-provided VPN, a SONET ring;
- b. Explanation of how health care provider sites will connect to (or access) the network, including the access technologies/services and transmission speeds;
- c. Explanation of how and where the network will connect to a national backbone such as NLR or Internet2;
- d. Number of miles of fiber construction, and whether the fiber is buried or aerial;
- e. Special systems or services for network management or maintenance (if applicable) and where such systems reside or are based.

THINC's initial activity as specified in the award is to develop a network design to connect all named entities to the network. The network design RFP is in progress and has not yet been submitted for public bid. Consequently, we have not completed the competitive bidding process, vendor selection or network build out. It is too soon for a response to question 3.

**4. List of Connected Health Care Providers: Provide information below for all eligible and non-eligible health care provider sites that, as of the close of the most recent reporting period, are connected to the network and operational.**

- a. Health care provider site;
- b. Eligible provider (Yes/No);
- c. Type of network connection (e.g., fiber, copper, wireless);
- d. How connection is provided (e.g., carrier-provided service; self-constructed; leased facility);
- e. Service and/or speed of connection (e.g., DS1, DS3, DSL, OC3, Metro Ethernet (10 Mbps) ;
- f. Gateway to NLR, Internet2, or the Public Internet (Yes/No);  
Federal Communications Commission FCC 07-198  
74
- g. Site Equipment (e.g., router, switch, SONET ADM, WDM), including manufacturer name and model number.
- h. Provide a logical diagram or map of the network.

Our project is in the process of bidding out the design phase of our network, prior to the build out. The network is not yet build nor is it operational. Consequently, no health care provider sites are connected to the network.

**5. Identify the following non-recurring and recurring costs, where applicable shown both as budgeted and actually incurred for the applicable quarter and funding year to-date.**

- a. Network Design
- b. Network Equipment, including engineering and installation
- c. Infrastructure Deployment/Outside Plant
  - i. Engineering
  - ii. Construction
- d. Internet2, NLR, or Public Internet Connection
- e. Leased Facilities or Tariffed Services
- f. Network Management, Maintenance, and Operation Costs (not captured elsewhere)
- g. Other Non-Recurring and Recurring Costs

The only costs to date are costs incurred in the process of developing the network design RFP. While not yet complete, approximated 100 man hours have been expended in developing the RFP. No other costs of any type have been incurred.

**6. Describe how costs have been apportioned and the sources of the funds to pay them:**

- a. Explain how costs are identified, allocated among, and apportioned to both eligible and ineligible network participants.

At this time there are no ineligible participants in the program so no costs have been identified or allocated to ineligible participants.

Once the surveys are completed and the network design is complete, costs will be identified and apportioned to the participants based upon a utility model. That is, apart from their membership fee, costs will be apportioned based upon their use of the network. A monthly minimum fee will be established and once the minimum is reached, additional fees will be based upon utilization of the network. The exact amounts and formulas have not yet been developed.

b. Describe the source of funds from:

- i. Eligible Pilot Program network participants
- ii. Ineligible Pilot Program network participants
- c. Show contributions from all other sources (e.g., local, state, and federal sources, and other grants).

The four founding members each pledged \$25,000 to cover start up costs for the new entity, its governance and management and other administrative costs and fees as they occur. Staff is on loan from the members to the initiative and all personnel costs are being contributed by the members for staff time involved on FCCRHPP activities. To make judicious use of limited financial resources and to practice good stewardship, THINC does not plan on hiring any staff and will continue to borrow necessary staff and expertise from within the member organizations for as long as possible. At some point in time it may be necessary to hire staff directly for this effort.

Many of the activities associated with this program require substantial commitment in time and resources. While the activities continue to move forward at a reasonable pace, more progress could be achieved if resources were available within the activity funding to support those critical tasks that must be performed in fulfillment of the program.

The State of Texas has verbally committed to a financial contribution that would cover the 15% of costs that are not covered by the pilot program. That funding has not yet been requested nor has it been offered.

- i. Identify source of financial support and anticipated revenues that is paying for costs not covered by the fund and by Pilot Program participants.

Please see the immediate preceding response above.

- ii. Identify the respective amounts and remaining time for such assistance.

The State of Texas has verbally expressed its willingness to provide up to \$3 million once the new entity is in place and the design is completed. There is no expiration date for the assistance which will in part be in the form of economic development funds.

- d. Explain how the selected participant's minimum 15 percent contribution is helping to achieve both the selected participant's identified goals and objectives and the overarching goals of the Pilot Program.

It is too early for goals of the individual participants to be enabled; we are therefore unable to comment on how their minimum 15% contribution is helping them achieve their goals. The 15% contribution will be required of all participants and will be used to help support and maintain the network, once it is completed.

**7. Identify any technical or non-technical requirements or procedures necessary for ineligible entities to connect to the participant's network.**

Non eligible entities will be required to cover 100% of the costs of connecting to the network. We have not yet addressed requirements or developed policies and procedures for ineligible entities to connect to the participant network.

**8. Provide an update on the project management plan, detailing:**

a. The project's current leadership and management structure and any changes to the management structure since the last data report; and

No changes have been made to the project's leadership and management structure since the inception of the program.

b. In the first quarterly report, the selected applicant should provide a detailed project plan and schedule. The schedule must provide a list of key project deliverables or tasks, and their anticipated completion dates. Among the deliverables, participants must indicate the dates when each health care provider site is expected to be connected to the network and operational. Subsequent quarterly reports should identify which project deliverables, scheduled for the previous quarter, were met, and which were not met. In the event a project deliverable is not achieved, or the work and deliverables deviate from the work plan, the selected participant must provide an explanation.

The first activity of our project is to perform a network design. The RFP for the design is not yet complete and the RFP must be in the public for 28 days before a vendor can be selected. With 199 sites to consider, it is hoped that the design will take no more than three months to complete. Following the network design, building out of the network must be publicly bid which will require an additional three months for RFP development, bidding, award and the start of construction. With eight months remaining before network building begins, it is difficult to state with accuracy the dates which each health care provider will be connected to the network. The network build out will be completed in phases and the design will guide the order of the roll out. We expect to have the dates when each provider is expected to be connected in the next quarterly report.

ACTIVITY	START	END	STATUS
1. Form new not for profit corporation	4-1-2008	9-1-2008	80% complete
2. Management and governance in place	4-1-08	6-1-08	100% complete
3. Review participant list	5-1-08	9-1-08	40% complete
4. LOAs signed and returned	6-1-08	9-1-08	10% complete
5. Design RFP created	4-1-08	9-1-08	70% complete
6. Form 456 submitted	9-1-08	9-1-08	0%
7. Form 466 submitted	10-1-08	10-1-08	0%
8. Network design vendor selected	10-1-08	10-10-08	0%
9. Network design performed	10-15-08	02-15-09	0%
10. Prepare network build RFP	01-01-09	03-01-09	0%

## HIGH LEVEL PROJECT PLAN – MAJOR MILESTONES TO NETWORK BUILD RFP PHASE

### 9. Provide detail on whether network is or will become self sustaining. Selected participants should provide an explanation of how network is self sustaining.

The network is not self sustaining at this time. The plan is for the network to become self sustaining over time. Costs for building, maintaining, supporting, governance, management and growth of the network are currently unknown. As the project moves forward and costs become more certain, a timeline to self sustainability will be developed.

A number of high level discussions have occurred with various organizations both public and private that would support self sustainability. However, some of the suggested activities may be ineligible under the rules of the program and will need to be evaluated. This limits sustainability to fees paid by users to cover all costs (apportioned fee basis) or charitable contributions. These limitations will be taken into account in determining a more certain time line for self sustainability.

**10. Provide detail on how the supported network has advanced telemedicine benefits:**

- a. Explain how the supported network has achieved the goals and objectives outlined in selected participant's Pilot Program application;
- b. Explain how the supported network has brought the benefits of innovative telehealth and, in particular, telemedicine services to those areas of the country where the need for those benefits is most acute;
- c. Explain how the supported network has allowed patients access to critically needed medical specialists in a variety of practices without leaving their homes or communities;
- d. Explain how the supported network has allowed health care providers access to government research institutions, and/or academic, public, and private health care institutions that are repositories of medical expertise and information;
- e. Explain how the supported network has allowed health care professional to monitor critically ill patients at multiple locations around the clock, provide access to advanced applications in continuing education and research, and/or enhanced the health care community's ability to provide a rapid and coordinated response in the event of a national crisis.

Due to the early phase of development and the lack of a network at this time, apart from garnering much interest on the part of many individuals and organizations about the promise of advancing telemedicine through this initiative, there has been no progress to date.

**11. Provide detail on how the supported network has complied with HHS health IT initiatives:**

- a. Explain how the supported network has used health IT systems and products that meet interoperability standards recognized by the HHS Secretary;

While the network is not yet operable, and the core clinical information systems of the founding members are different, three of the four founding members' core clinical information systems meet the interoperability standards recognized by the HHS secretary. The fourth founding member is an association of rural hospitals.

b. Explain how the supported network has used health IT products certified by the Certification Commission for Healthcare Information Technology;

The founding members' core clinical information systems – EPIC EMR, MEDITECH, are CCHIT certified. Since our network is not yet operational, they are not used in conjunction with the network – yet!

c. Explain how the supported network has supported the Nationwide Health Information Network (NHIN) architecture by coordinating activities with organizations performing NHIN trial implementations;

None of the NHIN trial implementations are close to our geographic area; however, through the Governor's office has coordinated educational programs between health care providers and the Indiana NHIN trial, eHI best practices and by developing a roadmap for health IT for Texas that incorporates the NHIN architecture. In addition, the individual members have their own initiatives that incorporate the NHIN standards in order to improve the coordination of care for all.

d. Explain how the supported network has used resources available at HHS's Agency for Healthcare Research and Quality (AHRQ) National Resource Center for Health Information Technology;

THINC is aware of AHRQ's resource center but has not made use of it to date. A number of proposed activities and outcomes measures for the network will use the AHRQ National Resource Center as we begin to define our core measures and impact. We have made contact with individuals at AHRQ but have not utilized their services yet.

e. Explain how the selected participant has educated themselves concerning the Pandemic and All Hazards Preparedness Act and coordinated with the HHS Assistant Secretary for Public Response as a resource for telehealth inventory and for the implementation of other preparedness and response initiatives; and

In Texas, health care institutions are experienced in emergency preparations. The participant was ground zero for Hurricanes Rita and Katrina; during Katrina, our hospitals were forced to evacuate and during Katrina, our hospitals received and provided care for thousands of people displaced by the storm. Experience helped inform both state and federal officials as the PAHPA legislation was being drafted. We continue to participate in exercise drills at the local, state and national level.

f. Explain how the supported network has used resources available through HHS's Centers for Disease Control and Prevention (CDC) Public Health Information Network (PHIN) to facilitate interoperability with public health and emergency organizations.

The participant's clinical information system is interfaced with the CDC's Biosense and NEDSS programs that utilize PHIN to enable real time access to reportable events to both the CDC and the State of Texas. Due to the network not being ready, we are not using the network for PHIN reporting. We fully expect the network will be used to support these activities in the future, once it is available.

**12. Explain how the selected participants coordinated in the use of their health care networks with the Department of Health and Human Services (HHS) and, in particular, with its Centers for Disease Control and Prevention (CDC) in instances of national, regional, or local public health emergencies (e.g., pandemics, bioterrorism). In such instances, where feasible, explain how selected participants provided access to their supported networks to HHS, including CDC, and other public health officials.**

While still early in the program, current coordination activities with the CDC HHS regarding pandemics, public health emergencies are limited to efforts of the individual participants. It is fully expected that once the network is operational, the network will be used to better coordinate communication and detection among all participants.
